

CRM WORKFLOW & PIPELINE SAMPLE

Executive VA / Operations Portfolio • Demonstration Project

Objective

Demonstration project: organize a lead pipeline, standardize follow-ups, and reduce missed next steps.

This is a portfolio simulation created to demonstrate CRM organization and workflow thinking. No client data is used.

Pipeline Structure

Stage	Purpose	Next Action
New Lead	Capture and verify lead	Initial outreach
Contacted	Track first communication	Follow-up if no reply
Qualified	Confirm fit and need	Schedule next step
Proposal / Review	Track active opportunity	Follow up on decision
Won / Onboarding	Move customer into delivery	Send onboarding steps
Lost / Nurture	Record outcome	Re-engage when appropriate

Sample Workflow Logic

New lead → assign owner → verify contact information → initial outreach → create follow-up task → update status → document outcome → move to next stage.

Escalation rule: if a lead is active but has no documented next action, flag it for review.

CRM Hygiene Checklist

- ✓ Required fields completed
- ✓ Duplicate records checked
- ✓ Lead source recorded
- ✓ Current stage matches actual status
- ✓ Next follow-up date exists
- ✓ Notes are concise and actionable

Tools Demonstrated

CRM concepts applicable to platforms such as GoHighLevel, Zoho, Kartra, and Salesforce, based on the tools listed in the resume.
