SOP: CRM Follow-Up Management

Purpose: ensure every active lead has a clear next action and follow-up date.

Frequency: review daily; perform a deeper cleanup weekly.

Procedure

1. Open the active pipeline.
2. Filter records with missing next actions or overdue follow-ups.
3. Review the latest notes and communication history.
4. Determine the appropriate next step.
5. Update status, notes, owner, and follow-up date.
6. Flag exceptions requiring manager/client attention.
7. Record completion in the daily operations tracker.

Quality Standard

Every active record should have an accurate stage, concise notes, responsible owner, and documented next action.

Escalation Criteria

Conflicting customer information • High-priority complaint • Time-sensitive deadline • Missing critical data • Process exception

Result

Cleaner CRM data, fewer missed follow-ups, clearer ownership, and better visibility into the pipeline.
